

Vinod Namboodiri, Ph.D.

Vinod Namboodiri, Ph.D., is a Full Professor and the Associate Director for Research Engagement in the School of Computing at Wichita State University. He directs the Assistive and Accessible Computing (ACCESS) Research Laboratory which has the mission of exploring the design, evaluation, and use of computing and information technologies (in the form of Assistive and Accessibility Technologies) to benefit people challenged by disabilities. He currently leads large convergent teams on two National Science Foundation (NSF) projects that aspire to make it easier for persons with disabilities to navigate built environments. Vinod received his Ph.D. from UMass Amherst and has held appointments as an Adjunct Senior Scientist at the Envision Research Institute and as an Affiliated Faculty in the Dept. of Biomedical Engineering at Wichita State University. Vinod has experience serving both as a graduate program director and as the director for a National Science Foundation (NSF)-funded Research Experience for Undergraduates (REU) site.
