DIGITAL DESIGN COMPETITION

FULLY REMOTE

CALLING ALL ENGINEERING SCHOOLS!

Join Autodesk and Toyota Material Handling in shaping the future of engineering with the upcoming Engineering Digital Design Competition. Challenge your students to revolutionize real-world products using cutting-edge digital design tools such as Fusion.

Competition Theme: Modular Attachment System for Automated Counterbalanced Forklifts

Design a modular attachment system for automated sit-down counterbalance forklifts, enhancing their versatility across various tasks and cargo types.

Your students innovations could be used in the industry!

Build new/better connections with two industry leaders!

Students gain real world experience, and win prizes and certificates!
