THURSDAY, May 1, 2025

4 - 5 p.m.

**Bonderson Engineering
Projects Center**

1 Grand Ave., San Luis Obispo, CA 93407

Reception to Follow

Susan "Susie" Armstrong is a Cal Poly computer science graduate and senior vice president at Qualcomm. Over her tenure at Qualcomm, Armstrong has held various leadership positions. She led the development and commercialization of the software powering Qualcomm's chipsets. She later headed the global Customer Engineering team, collaborating with base station manufacturers, carriers and device makers worldwide to bring new technologies to market. In 2015, she joined Qualcomm's Government Affairs group, where she applies her engineering and product expertise to public policy work, including cybersecurity, intellectual property and STEM education.
