BUILDING 7

Baroness Bryony Worthington is a leading climate campaigner and a member of the UK House of Lords, where she has firsthand experience with the challenges of public policy at the highest levels of government. Described by her colleagues as “obsessed with data”, her work focuses on data-driven approaches to tell compelling stories. Worthington is also co-founder of KilnerTech, a Silicon Valley startup that uses artificial intelligence to help citizens and activists better engage with their elected leaders.
