

# STAFF SPOTLIGHT

## 5 Questions with Allie Walter

Executive Assistant to the Dean

### **What brought you to Cal Poly College of Engineering?**

I had been at Cal Poly for more than 10 years and was ready for a change. I had worked with CENG faculty, staff and students before through my roles in the Division of Research and had always been extremely impressed. I jumped at the opportunity to work in the college.

### **What is your favorite part of your job?**

The people!

### **What is your favorite place in San Luis Obispo County and why?**

Anything with a trail and a view. I love hiking with my family and am constantly amazed by our beautiful county.

### **What is the most helpful advice you've received?**

That when one door closes, another one opens. I try to remember that things often have a way of working themselves out; maybe it's not how I thought it would go, but maybe it's better and I just couldn't see that before.

### **How do you like to spend your free time?**

Playing board and card games with my family, baking and cooking (especially new recipes) and exploring the Central Coast.

**CAL POLY**  
College of Engineering
